

Potty Training Policy

All three and four-year-old students must be fully potty trained before entering their respective classrooms.

Summer is a great time to potty train. There is more time to stay home and focus on helping your child successfully learn to potty.

- Children are expected to demonstrate the ability to independently pull their pants up and down. We encourage parents to dress their three and four-year-olds in loose-fitting clothing around the waist to facilitate an easier and more independent experience when pulling pants up and down during visits to the restroom.
- Students must be capable of washing their hands after using the restroom. Proper handwashing is a crucial component of maintaining a hygienic environment.
- For sanitary reasons, we do not use or allow training seats or potty inserts in our preschool facility. This policy is in place to uphold high standards of cleanliness and hygiene.
- If a child in the three-year-old class is not exhibiting the necessary potty training skills, such as informing the teacher about restroom needs and remaining accident-free, parents will be notified. They will then be given three weeks to collaborate with us at preschool while working with their child at home. If, after this period, the child still does not demonstrate an understanding of potty training skills, they may be offered a placement in the older two-three year old class, provided a spot is available. In the absence of an opening in the older two-three year old class, the child will not be eligible for continued care until they have achieved full potty training.
- If there are medical or other reasons that a child 4 years or older is not potty trained, please contact the Director.
